ABOUT 'THE SILVAS'

"Silva" is a latin word meaning "wood" or "forest". The plural form can be used to refer to the trees of a particular region. As some know, I have lived in Southern California for my entire life up to this point. One of the reasons I have loved it so much is because of the weather and scenery. We have some of the most beautiful beaches, great mountains of Big Bear, as well as hot and sunny days. Recently, I traveled up north. After passing through the Grapevine off of the I-5 entering into "Norcal", I noticed a lot more trees; The Bay Area and beyond really felt like a different state to me. Santa Cruz through Redding have some of the most beautiful trees I have ever seen : The Redwoods. As I entered Oregon, there were even more : White Oak, Ponderosa Pine, and Red Alder, to name a few. They were great and epic, some of the best things to see while driving... 'Wait - so this is a piece about trees?' you might ask. I would emphatically say, Yes!

As I made my way into Washington, the allure of the trees there fully came into fruition for me, as they seemed to increase in number. This was in such contrast to what I see on a daily basis back in Socal, so much, that it inspired me to compose this piece. "The Silvas" is an homage to the trees I saw from mid-Norcal, through Washington. Tree's are strong, as represented in the piece's opening, "With Strength" (as the first expression mark). They are full of energy and life as I show through the melody and musicality at rehearsal mark 17. These trees are also 'Delicate, Yet Stable' (rehearsal mark 46). I see the leaves as very delicate but the roots as very stable. That section is followed by a 'Tenacious' section that reminds me of how resilient trees are against harsh weather and man-made problems. These forms of life will persist to exist; this is a blessing because as I once heard, and I deem this to be very true, "*Trees are the lungs of the Earth*".

Brandon Johnson

La Verne, California

GENERAL NOTES

This piece's macro-form is simply A-B-A'-B'

A : Measures 1-16

B : Measures 17 - 39

A' : Measures 40 - 66

B' : Measures 67 - 111 (end)

The micro-form version below will be discussed along with articulations, melody, harmony, percussion, etc.

Micro-Form :

Introduction : m. **1** - 12

Transition 1 : m. 13 - **16**

Melody Section 1 : m. **17 - 39**

Developed Introduction : m. **40** - 45

Solo Section : m. 46 - 53

Transition 2 (with intro material) : m. 54 - 56

"Tenacious" : m. 57 - 62

Transition 3 : m. 63 - **66**

Melody Section 2 : m. **67** - 83

Interlude : m. 84 - 87

Melody Section 3 : m. 88 - 93

Transition 4 : m. 94 - 97

Melody Section 4 : m. 98 - **111 (end)**

Intro. - m. 1 - 12

The intro up to the second inversion F major chord at bar 13 can be thought of as F Mixolydian. There is an Eb tonality to start, but takes a modal turn when the Dm7 chord hits at bar 4. The Dm7 is emphasized again in bar 8 when the whole ensemble plays and adds more color with an extra note, G in the 2nd Trumpet. It results in a thick, Dm7sus4 chord. Melodically, the 1st Trumpet sets up the d minor figure going into the first chord at bar 4. The flute, oboe, and first clarinet seem to further this idea along. It is imperative to contrast the tenuto markings in the woodwinds from the accents before.

Trumpet 1

Flutes

→

p *mf*

The next step to the melodic figure is after the alto sax and euphonium play it, the outer voices respond with a syncopated figure ending in c minor.

The musical score shows a transition starting with an Euphonium part in bass clef, followed by a right-pointing arrow, and then parts for Flutes and Tuba. The Flutes play a melodic line with eighth-note patterns, while the Tuba provides harmonic support with sustained notes.

The melody in the trumpets at bar 10 is the unaccented, legato version of the very beginning idea. Further ahead in this phrase, it becomes more call and response like and builds interest with quarter note motion in the bass and tenor voice to culminate into the second inversion F major chord at bar 13.

Transition 1 & Melody Section 1 - m. 13 - 39

This is a "subtle" transition because even though the percussion leads the tempo change, it should start very soft (felt more than heard). This percussion build sets up the groove oriented texture of much of the piece.

The Bb key signature is kept throughout but the modality tends to shift (A flat chord, Eb Lydian) at times but sections tend to cadence in F. The harmonic implication of m. 17 - 20 is EbMaj. for two bars, F Maj. for one bar, and F Maj./A for a bar. Measure 21 - 25 is an extended version with a change of harmony every bar EbMaj./G, Bb/C, c minor, and the last two bars before the mini transition vacillates from d minor to F major. Below is the main melody's first two bars. Most of the time when the melody is heard, the first two bars are the same :

The musical score shows the first two bars of the main melody for Alto Saxophone in G clef. The first bar consists of quarter notes, and the second bar consists of eighth notes. Articulations are indicated with 'mf' (mezzo-forte) and slurs.

The articulations are very important here. *All staccato notes (especially quarter notes) in this piece should follow the school of thought that staccato notes should be played as half of its value, not as short as possible.* An even clearer example of this is the low woodwind rhythmic accompaniment at bar 17 and throughout.

The musical score shows a rhythmic pattern for Bass Clarinet in G clef. It features a series of eighth notes and sixteenth notes, primarily consisting of eighth-note pairs. Articulation is marked with 'mp' (mezzo-piano).

I wrote unaccented quarter notes and 8th notes to follow for better readability, rather than all 8ths. All notes here are the same length. As the whole ensemble plays at 28, the composite melody is a call and response.

Make sure both ideas stay in the foreground. This section ends in F, once again.

Developed Intro., Solos, & Transition 2 - m. 40 - 56

This small section includes more 8th notes to give forward momentum. Harmonically an Am7/C, Bb5, and G5 is added after the Dm7 chord. We get this descending motion : Dm7 - Am7/C - Bb5 - G5 that segues well into the next, slower tempo. More character is added by the back-beat percussion. The slapstick and snare cross-stick combine timbre for a tasty groove underneath the winds texture, not as loud impacts.

Going into bar 46, the clarinet solo does indeed start on beat 4 of bar 45. This section is "Delicate, Yet Stable" due to the light overall texture of a series of short solos. Think of these solos as leaves; light, expressive, and wonderfully detailed. The more rhythmically stable aspects come from the low brass presence on the strong beats of bar 49. The clarinet soloist comes back on beat two of bar 52 and should float on top of the clarinet texture to take you into the familiar material at bar 54. The ending 8th notes of bar 56 ascend in a C minor pentatonic fashion, rather than descending like before...

"Tenacious" - m. 57 - 62

This section can be thought of as the strength and glory that trees represent, it should be big and powerful. It's in F minor for the most part but cadences in F major at 61. Similar to the melody sections, the treble and bass voices trade off responsibilities. There are a variety of articulations and it's imperative to make sure the notes with no marking is distinctly different than the staccatos. The bass/tenor/alto 8th notes at 60 have tenuto to unmarked notes that utilize slight separation (as opposed to tenuto to staccato [bar 18]).

The flutes, trumpets, and first clarinets alter the 16th note figure from bars 3 and 4. This idea develops into a whole bar and we get the figure at bar 60.

The bass voice at bar 61 should embrace the dissonant Gb on the & of 3 for a satisfying resolution at bar 62.

Transition 3, Melody Section 2, & Interlude - m. 63 - 67

The bassoon once again displays a groove, this time as a textural change from the full ensemble moment.

The melody comes back in the low brass and the clarinets now have the rhythmic role. Foreground and background ideas are similar to before, but it will take some time for the ensemble to effectively execute the sudden piano dynamic on beat one of bar 77, particularly for the french horn and bass instruments who have an accent on the & of 1 at bar 76. Make sure all instruments play the staccatos at 77 in a very crisp manner. The next phrase is brass and percussion only. This texture change gives your brass the opportunity to shine. The woodwinds take the spotlight as it overlaps the phrase and briefly deviates from the melody with this smooth interlude.

Melody Section 3, Transition 4, & Melody Section 4 - m. 88 - End

From here to the end the melody is played in full three more times. The melody at 88 is in the upper woodwinds, trumpets, and is now in Bb. Bar 94 presents melodic fragments that transition into the next version of the melody. This version brings back the call and response element. Just when you think we're ending, a shimmering Eb Major 7th chord slams through, this is a final statement of Eb. Bar 103 lets the woodwind 8th notes come through strongly while the alto and tenor voices play the last version of the melody in different intervals starting off in minor 3rds instead of the perfect 5ths of the very first version. Bar 107 to the end is a ii-V-I progression which is satisfying, as this is the only Bb cadence in the piece. A huge V-I, in a way.

THE PERCUSSION

PERC. 1 : glock, slapstick, triangle, crash cyms.

PERC. 2 : 4 timpani, sus. cym., splash/effect cym.

PERC 3 : sus. cym, hi-hat, gong, mark tree

PERC 4 : snare, ride

PERC. 5 : bass drum

The percussion can have multiple players on percussion 1, 2, & 3 but one player on 4 and 5 is suggested. the original intent is to have 5 players total. Make sure the timpanist has two pairs of mallets - hard and medium softs (changes will be indicated in the part). A splash cymbal is preferred on this part, but any small effect cymbal will work (such as a china cym.) Additional, general notes will be jotted down in order of score appearance.

- If there is an "l.v." or a tie that doesn't end on a note, that means "let vibrate" or "let ring" eg., the glock. at bar 4 should not ring over into bar 5.

-Exaggerate all soft dynamics in the ride cymbal part. This cymbal can be very lushy and cover the ensemble if played incorrectly.

-The circles above the hi-hat notes indicate a loose hi-hat and not completely open. The regular notes are a firm, closed hi-hat. The player should not have to press hard or create large foot movements.

-The slapstick and cross-stick snare groove at bar 41 should be a subtle, tasteful timbre that adds to the texture. They should play it as a soft, tender groove that fits in and does not distract.

-The marcato ride cymbal notes indicate a different timbre that is executed by playing the cymbal with a substantial amount of the surface area of the stick's shoulder (instead of just the bead).

-This piece gives your timpanist a great learning opportunity for changing notes while playing. This will take some practice outside of rehearsal time, as well as coordinating when to change notes in between rests.

Suggestions are indicated in the part.

- All snare drum rim shots are the type that the player strikes the head and the rim simultaneously.

- At bar 57, the combined slapstick, splash cym., and rim shot should function as a band setup for the & of 2.

- The ride cymbal dome (also called the bell), playing zones are very important and should be clearly distinguished from the other ride hits.

Perusal Score

A landscape photograph featuring a majestic mountain range in the background under a clear blue sky. In the foreground, a dense forest of tall evergreen trees covers a hillside. A large, semi-transparent watermark is overlaid diagonally across the image, reading "Perusal Score" in a bold, black, sans-serif font.
